

G.E.M.M.® in Practice: Clinician Mentoring Programme

ACCREDITATION PATHWAY
CLINICIAN MENTORING
PRACTICE-READY

From Foundations to Accreditation - Practice-ready implementation

The G.E.M.M.® Mentoring Programme supports practitioners as they implement the G.E.M.M.® Protocol with confidence and clinical precision, bridging the gap between theory and application.

This structured, three-part program guides you step-by-step through the Foundations Course and each upskill session, through to the final Accreditation Assessment, ensuring understanding of core concepts and best-practice clinical implementation.

Throughout the programme, you will develop:

- Stronger understanding of core nutrigenomic principles in practice
- Greater confidence in formulation selection
- Safe and effective titration of sulforaphane
- Practical implementation strategies across common patient types
- Applied clinical thinking through live case discussion
